

Technical requirements

A static cloudswing act requires:

- 2 rigging points of 5,8m high
- A distance of 2,9m in between these two points
- Stage or safety space of at least 6x3 meters around the cloudswing
- A sound system able to play from CD, Ipod, or file previously sent by e-mail

Those specifications provide a general idea. It is possible to adapt the act to different environment, either inside or outside. Please contact the artist if you need any additional information.
